

Dear sirs

As part of improvements to non-motorised travel, the community has been seeking to improve foot and cycle path connections between Kimpton and Harpenden.

One of the initiatives under consideration is the provision of a cycle path upon the route indicated upon the attached plan. We understand that land effected by this proposal is within your ownership.

Work proposed would include the creation of a permitted bridle path. This would require the use of a strip of land approximately 3m wide normally along a field edge.

Our initial enquiry is to ask if you would be happy to positively engage in this process.
